

Super Tuesday data attribute table

FIELD NAME	FIELD TYPE	FIELD DEFINITION
STATE	Text	State
COUNCIL	Text	Council name
SITE_ID	Integer	Site identifier – Format - #####
LATITUDE	Integer	Latitude
LONGITUDE	Integer	Longitude
LEGS	Integer	Number of intersection legs
DESCRIPTION	Text	Site description (Street names) – Format - NAME [direction]
LAYOUT_#Ex	Integer	Azimuth of exit leg of the site/intersection, relative to north. Each Leg will have an exit and an entry, and the exit azimuths (degrees on the compass) draw the map of the intersection.
LAYOUT_#_En	Integer	Azimuth of entry leg of the site/intersection, relative to north. Each entry will be 180° from the corresponding exit.
LEG#-#	Integer	Total trips for each leg-leg combination
LEG#_ENTER	Integer	Total number of entry movements per leg
LEG#_EXIT	Integer	Total number of exit movements per leg
LEG#_TOTAL	Integer	Total number of combined entry and exit movements per leg
WOMEN	Integer	Total women cyclists (pushbike)
MEN	Integer	Total men cyclists (pushbike)
NOT KNOWN	Integer	Total gender not known cyclists (pushbike)
TOTAL_THISYEAR	Integer	Total volume cyclists (pushbike +ebike combined)
TOTAL_LASTYEAR	Integer, Text	Total volume cyclists for previous year (pushbike +ebike combined)
COMPARISON	Integer	Variation between current volume and previous year (growth decimal)
COMPARISON_%	Integer	Variation between current volume and previous year volume (growth percentage)
WOMEN EBIKE	Integer	Total women cyclists on ebikes
MEN EBIKE	Integer	Total men cyclists on ebikes
NOT KNOWN EBIKE	Integer	Total gender not known cyclists on ebikes
TOTAL EBIKE	Integer	Total volume cyclists on ebikes
WOMEN MM	Integer	Total women on Micro Mobility (E-Scooters)
MEN MM	Integer	Total men on Micro Mobility (E-Scooters)
NOT KNOWN MM	Integer	Total gender not known on Micro Mobility (E-Scooters)
TOTAL_MM	Integer	Total Micro Mobility (E-Scooters)
COUNT DATE	Integer	Date of the count - Format – DD/MM/YYYY
7:00 AM	Integer	Total Volume counted in each 15-minute increment
TRIPS/HOUR	Integer	Average Trips per hour

Super Sunday data attribute table

FIELD NAME	FIELD TYPE	FIELD DEFINITION
STATE	Text	State
COUNCIL	Text	Council name
SITE_ID	Integer	Site identifier – Format - #####
LATITUDE	Integer	Latitude
LONGITUDE	Integer	Longitude
LEGS	Integer	Number of intersection legs
DESCRIPTION	Text	Site description (Street names) – Format - NAME [direction]
LAYOUT_#Ex	Integer	Azimuth of exit leg of the site/intersection, relative to north. Each Leg will have an exit and an entry, and the exit azimuths (degrees on the compass) draw the map of the intersection.
LAYOUT_#_En	Integer	Azimuth of entry leg of the site/intersection, relative to north. Each entry will be 180° from the corresponding exit.
LEG#-#	Integer	Total trips for each leg-leg combination
LEG#_ENTER	Integer	Total number of entry movements per leg
LEG#_EXIT	Integer	Total number of exit movements per leg
LEG#_TOTAL	Integer	Total number of combined entry and exit movements per leg
BICYCLE	Integer	Total volume cyclists (pushbike)
E-BIKE	Integer	Total volume cyclists (e-bike)
WALKER	Integer	Total volume walkers
RUNNER	Integer	Total volume runners
DOG	Integer	Total volume dog-walkers
MICRO	Integer	Total volume Micro Mobility (e-scooters)
OTHER	Integer	Total volume other active travel
TOTAL	Integer	Total volume all user types
LAST YEAR	Integer	Total volume all user types – Last Year, if applicable
COMPARISON	Integer	Variation between current volume and previous year (growth decimal)
COMPARISON_%	Integer	Variation between current volume and previous year volume (growth percentage)
COUNT DATE	Integer	Date of the count - Format – DD/MM/YYYY
9:00 AM	Integer	Total Volume counted in each hour-long increment
